Notes

How much is 1/2 of 1/2?

The word 'of' usually indicates that you are to do multiplication and these are no different.

Multiplication of fractions is easy. You merely multiply across the top. In this instance 1x1 is 1.

Then you multiply across the bottom. 2 x 2 is 4.

Your answer is 1/4

$$\frac{1}{2} \text{ of } \frac{3}{4} \approx \frac{\square}{\square}$$

Congratulations!
