 <table border="1" data-bbox="228 1163 553 1633"> <thead> <tr> <th>LOCATION</th> <th>TIME</th> </tr> </thead> <tbody> <tr> <td>School</td> <td>3:00 p.m.</td> </tr> <tr> <td>Park</td> <td>3:05 p.m.</td> </tr> <tr> <td>Bank</td> <td>3:08 p.m.</td> </tr> <tr> <td>Barber</td> <td>3:10 p.m.</td> </tr> <tr> <td>Police</td> <td>3:15 p.m.</td> </tr> </tbody> </table>	LOCATION	TIME	School	3:00 p.m.	Park	3:05 p.m.	Bank	3:08 p.m.	Barber	3:10 p.m.	Police	3:15 p.m.	<p>Using schedules are a very important skill that you will find is useful in daily life as an adult.</p> <p>We have a very simple one here that shows the bus route schedule for the part of the day right after school lets out. If a student needs to know about what time they would be at the stop in front of the barber shop for a hair cut the schedule could help him know what appointment time was needed so that he wouldn't be late or too early with arriving by bus.</p> <p>There are many uses for a schedule. Let's say that the bus runs on Saturdays with the same schedule for that time of the day. If the bus rider lives near the police station and wanted to know how long the bus ride would be from the park to home, it could be calculated. The rider would get on at the park at 3:05 and get off the bus at 3:15. He could estimate the ride to be 10 minutes.</p>
LOCATION	TIME												
School	3:00 p.m.												
Park	3:05 p.m.												
Bank	3:08 p.m.												
Barber	3:10 p.m.												
Police	3:15 p.m.												

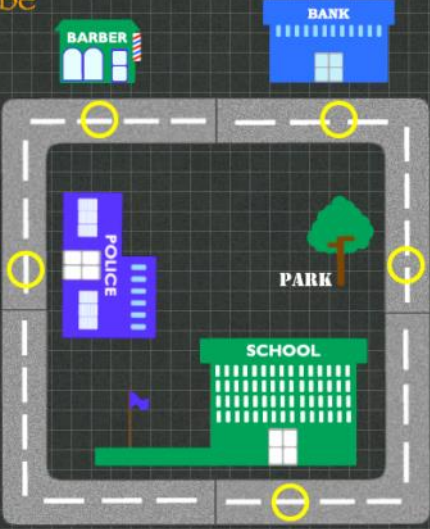

Try It

Click where will the bus be at 3:08 p.m.?

Schedule

LOCATION	TIME
School	3:00 p.m.
Park	3:05 p.m.
Bank	3:08 p.m.
Barber	3:10 p.m.
Police	3:15 p.m.
